"Economy" Wax Applier

Saves Wax — Saves Labor

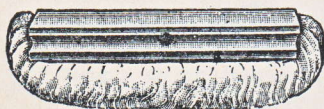

The block is 12 in. wide and equipped with sheep's-wool which may be removed and washed. The wax tank holds one quart of wax and is removable for refilling. The nozzle of the tank is equipped with a valve so that flow of the wax can be controlled. The wax flows from the container into a trough the full width of the applier. At the bottom of the trough are small holes through which the wax filters into the wool allowing a thin and even distribution of wax.

Mopping Outfit

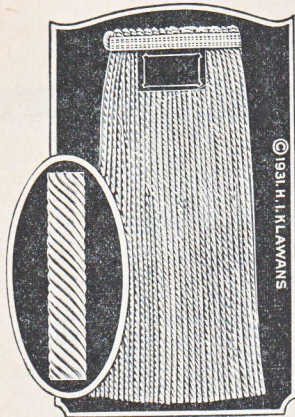

"Experiment and experience have proved that the most efficient method of cleaning floors of all kinds is the two-bucket method—the one for cleaning and the other for rinsing water."

The White Mopping Outfit, illustrated, exactly meets this need and has been planned and designed especially to lighten the work of janitors with extensive floor cleaning problems. It consists of one White Mop Wringer, two White Mopping Buckets and a White Mopping Truck. This outfit is easy to use and saves considerable hard work in the ease in which it can be pulled around from place to place.

CREAMERY BRUSHES

TEST BOTTLE BRUSH!

A strikingly new
idea in Brushes.

It thoroughly
cleanses Milk
and Cream Test
Bottles.

These bristles
twirl and squirm,
instantly remov-
ing the "hard-
to-get-at" stale
and musty mat-
ter that no brush
has yet been able
to thoroughly re-
move!

IT DOES THE TRICK!
